Preamble

The Uganda Palliative Care Provider Directory is an important resource to help anyone locate palliative care in or near their area in the country. The directory includes all palliative care programs, in hospitals, hospices, and other organizations that have listed themselves with or are known to the Palliative Care Association of Uganda (PCAU). All the listed palliative care providers voluntarily accepted a call by PCAU to be in this resource.

The directory includes both the subscribing members of PCAU and other palliative care providers. By listing these institutions, PCAU acknowledges the providers. However, this listing does not mean PCAU's endorsement of the quality of services at each of the listed facilities. That said, PCAU will strive to biennially update the information provided in this resource.

This important resource is therefore intended to contribute to easing locating palliative care and to strengthen referral. PCAU asks all users of this resource to engage directly with the listed providers in their own right and the users should not hold PCAU liable in any way as a result of using the information or lack of enough information in this document. The providers listed in this resource may contact PCAU to request an update of their information.

Introduction and Acknowledgments

The Uganda Palliative Care Provider Directory was developed mainly following calls from health practitioners who required a credible list of palliative care providers to aid palliative care referrals. Members of the public would also contact PCAU asking about palliative care within their areas. The document will therefore contribute to strengthening the referral pathways for children and adults who need palliative care in the country.

The directory was developed through a rigorous process that entailed reviewing several pieces of data and information. PCAU validated information provided in this resource by filling in an online survey questionnaire, email, and telephone correspondence with every individual heading a hospital, hospice, palliative care unit, or health center listed in the directory.

PCAU appreciates everyone who responded positively to the information request. The majority of palliative care providers gave a waiver to PCAU to publish their personal telephone and email contacts into this public document so that those who seek care in their regions can reach them.

This directory would not have been a reality without a team of dedicated staff and volunteers at the PCAU Secretariat. Particularly PCAU appreciates this team of individuals who volunteered to spearhead this project: Ms. Sheena Asiimwe who volunteered with the PCAU

Secretariat together with Maura Hogaboom who was an intern at the Center for Hospice Care (USA) and a student at the University of Notre Dame. They were supported by Dr. Matthew Sisk of the University of Notre Dame and Lacey Ahern, Director of Global Partners in Care at the Center for Hospice Care (USA). This team was also instrumental in the development of the online Uganda Palliative Care Provider Directory with Global Positioning System (GPS).

PCAU hopes that this resource will be valuable to all who need to locate palliative care in Uganda.

Mark-Donald Mwesiga

Executive Director – Palliative Care Association of Uganda

Background Information

Information about the Palliative Care Association of Uganda (PCAU)

The Palliative Care Association of Uganda (PCAU) is the National Association for Palliative Care Providers in Uganda with a mission to accelerate the integration of palliative care in Uganda's health care system.

PCAU was established in 1999 to advocate for Palliative Care services in Uganda and registered as a Non-Governmental Organisation (NGO) in 2003. PCAU is composed of 27 member Organisations and over 1,400 healthcare professionals, community health workers, community health caregivers, volunteers, and leaders at all levels in Uganda.

The Secretariat of PCAU operates from owned premises located in Kitende, along Entebbe Road, and runs 10 regional branches (committees) across the country as follows:

1. **Busoga Branch** – Works closely with Rays of Hope Hospice Jinja
2. **Kasese Branch** – works closely with Kagando Hospital PC Unit
3. **Kibale Branch** - Kakumiro
4. **Buddu Branch** – works closely with Kitovu

Mobile and Masaka RRH PC Unit

5. **Mityana Branch**
6. **Elgon Branch** – works closely with Joy Hospice Mbale and Mbale RRH PC Unit
7. **Mbarara Branch** – works closely with Mobile Hospice Mbarara and Mbarara RRH PC Unit
8. **Hoima Branch** – Works closely with Little Hospice Hoima and Hoima RRH PC Unit
9. **Arua Branch** – Works closely with New Life Hospice Arua (NELIHA), a satellite facility of PCAU and Arua RRH
10. **Bombo Branch** – works closely with Bombo Military Hospital Palliative Care Unit

The objectives of the Palliative Care Association of Uganda (PCAU)

1. To strengthen the capacity of palliative care providers in Uganda through supporting training, continuous professional education, mentorship, and supervision.
2. To advocate for a supportive environment and increase understanding of palliative care among stakeholders in Uganda.
3. To establish a hub of research and information on palliative care in Uganda.
4. To enhance resource mobilization and financial efficiency for palliative care in Uganda.
5. To enhance effective and efficient governance and management of palliative care services in Uganda.

PCAU Membership

PCAU Membership is open to organizations and individuals who agree with the objectives of the Association. Below is guiding information on how to subscribe to become a PCAU Member:

Membership Category	Membership Requirements
1. Institutional Member	Organizations providing palliative care or committed to the development of palliative care within Uganda. Subscribe with UGX 1,000,000 paid annually
2. Individual Members	Individuals interested in palliative care including health professionals. Subscribe with UGX 20,000 paid annually
3. Life Members	Individuals interested in palliative care and committed to the development of palliative care. Pay UGX 1,000, 000 once

Palliative Care Association of Uganda (PCAU)

What is **Palliative Care**?

Palliative care is the active holistic care of individuals across all ages with serious health-related suffering due to severe illnesses, and especially of those near the end of life. **It aims to improve the quality of life of patients, their families, and their caregivers.**

Palliative care:

- Includes, prevention, early identification, comprehensive assessment, and management of physical issues, including pain and other distressing symptoms, psychological distress, spiritual distress, and social needs. Whenever possible, these interventions must be evidence-based.
- Provides support to help patients live as fully as possible until death by facilitating effective communication and helping them and their families determine goals of care.
- Is applicable throughout the course of an illness, according to the patient's needs.

- Is provided in conjunction with disease-modifying therapies whenever needed.
- May positively influence the course of illness.
- Intends neither to hasten nor postpone death, affirms life, and recognizes dying as a natural process.
- Provides support to the family and the caregivers during the patient's illness, and in their own bereavement.
- Is delivered recognizing and respecting the cultural values and beliefs of the patient and the family.
- Is applicable throughout all health care settings (place of residence and institutions) and in all levels (primary to tertiary).
- Can be provided by professionals with basic palliative care training.
- Requires specialist palliative care with a multi-professional team for referral of complex cases.

What is the Holistic Approach in Palliative Care

The holistic approach or concept of total pain in palliative care focuses on the whole person, not just the condition.

- **Physical aspects** – These are involved with physical problems i.e., the signs and symptoms that a patient presents with, including their physical strength to perform activities of daily living.
- **Psychological aspects** – These include the path of an individual navigating the mental and emotional effects of their lived experience, right from the diagnosis to prognosis for example grief, fear, anxiety, anger, and depression.
- **Social aspects** – People are social beings by nature requiring regular communication. Long-term illness affects interpersonal relationships with the family, friends, and the community at large. The relationships can further be affected by dependency, financial challenges, and loss of status.
- **Spiritual aspects** – These include a person's search for meaning including hope, uncertainty, purpose, bereavement, and transition. It also encompasses belief systems and practices, a sense of belonging to an organized community of faith or religion, and legacy wishes.

Use of Oral Liquid Morphine Solution for Moderate to severe Pain

- Oral Liquid Morphine Solution is an opioid-based medicine meant for moderate to severe pain in conditions like cancer, HIV/AIDS, Sickle cell disease, and other painful terminal disease.
- It is only prescribed by medical doctors, qualified palliative care nurses, and clinical officers.
- This medicine does not hasten or cause death but relieves the pain to prevent suffering.

Importance of Palliative Care

- Palliative care improves the quality of life of patients (adults and children) and that of their families who are experiencing challenges associated with life-threatening illness, whether physical, psychological, social or spiritual.
- Palliative care approach relieves the suffering of patients and families through the early identification, correct assessment and treatment of pain and other problems.
- Palliative care offers a support system to help patients live as actively as possible until death thus ensuring that the life of a patient remains dignified, meaningful and fulfilling despite living with a serious illness.

- Palliative care can reduce on unnecessary hospital admissions and that allows the patient to make the most of the time they have with their families.
- Palliative Care addresses practical needs including providing bereavement counselling.

Who needs and the estimated need for palliative care

The need for palliative care in Uganda is increasing.

Only **11%** of those who need pain control and palliative care access it. The country's Health Sector Development Plan 2015/16 – 2019/20 showed that specialist palliative care services were being offered in only **4.8%** of the public hospitals in the country.

According to the World Health Organization (WHO) Palliative care is required for a wide range of diseases.

Palliative Care is required in the following conditions but not limited to:

- Cancer
- Cardiovascular diseases
- Chronic respiratory diseases
- HIV/AIDS

- Diabetes
- Kidney failure
- Chronic liver disease
- Multiple sclerosis
- Parkinson's disease
- Rheumatoid arthritis
- Neurological disease
- Dementia
- Drug-resistant tuberculosis.

Globally, only **14%** of people who need palliative care receive it and **98%** of children needing palliative care live in low- and middle-income countries with almost half of them living in Africa.

In children, other diseases that require palliative care include;

- Congenital anomalies (excluding heart abnormalities)
- Blood and immune disorders
- Meningitis
- Neurological disorders and neonatal conditions.

Pain and difficulty in breathing are two of the most frequent and serious symptoms experienced by adults and children in need of palliative care.

Who provides Palliative Care?

Palliative care is provided by a multidisciplinary team with a wide range of skills who support **patients**, their **caregivers** and **families**.

The team includes physicians, doctors, nurses, other paramedics, pharmacists, social workers, psychologists, physiotherapists, Chaplain, and volunteers all working together with the patients and their family.

Where can one access palliative care in Uganda?

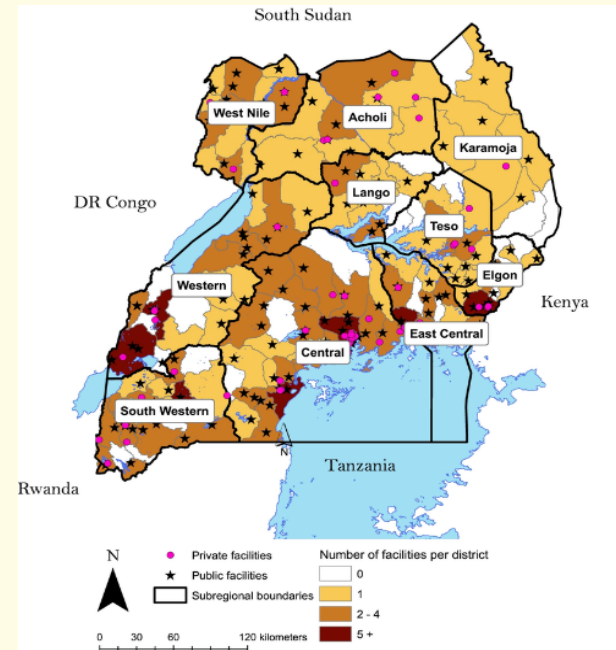

Palliative care can be provided at a health facility setting including hospitals, hospices, and can also be provided in the community through palliative care programs and at home by trained personnel.

Specialist palliative care services are offered at 226 public and private facilities in Uganda.

The models of palliative care provision include; outpatient services, inpatient palliative care units, consultation teams (at home, in the community, and

in hospitals), day care services, roadside clinics, and community outreaches.

A Map Showing Palliative care services points In Uganda

Source - Kagarmanova, A., Mwesiga, M.D., Sisk, M.L. et al. Palliative care in Uganda: quantitative descriptive study of key palliative care indicators 2018-2020. *BMC Palliat Care* 21, 55 (2022). <https://doi.org/10.1186/s12904-022-00930-7>

What are the **common myths and misconceptions that affect uptake** for palliative care in Uganda?

Myth: Palliative care makes death occur sooner.

Fact: Palliative Care helps improve comfort and quality of life from diagnosis until death and there are studies that show life being prolonged in some patients.

Myth: Palliative care is only for people dying of cancer.

Fact: Palliative care benefits all children and adults with serious health related suffering together with their families and friends.

Myth: People in palliative care who stop eating die of starvation.

Fact: People with advanced illnesses don't experience hunger or thirst as healthy people do.

Myth: Palliative care is only provided in a hospital.

Palliative care can be provided in a variety of locations, including at home, in the community, and hospitals.

Myth: Pain is a part of dying.

Fact: Pain is not always a part of dying. If pain is experienced near end of life, it can be addressed.

Myth: Taking pain medications in palliative care, leads to addiction.

Fact: Terminal illnesses may require increased doses of pain medication and that does not mean being addicted.

Myth: Morphine makes death happen faster.

Fact: Morphine in proper doses does not make death happen sooner.

Myth: Palliative care means the patient's doctor has given up and there is no hope.

Fact: Palliative care providers help one to live life as actively as possible.

Myth: If my family member or friend doesn't die at home, I'm letting them down.

Fact: Sometimes a person's needs cannot be met at home despite the best efforts.
